## PERSONAL PROJECTS

### Gas Agency Management System (04/2023 - 06/2023)

- Through out this project we learned that a project is not only a cost effective but flow of information is effective and efficient. This efficiency is characterized by the price of information which is placed on the computer and can be viewed and updated in organization through a single work station.
- The Gas Agencies get the order request through phone calls or by personal from their customers and deliver the gas cylinders to their address based on their demand and previous delivery date. This processes made computerized and the customer's name, address and stock details are stored in a database. Based on this the billing for a customers made simple and easier, since a customer order for gas can be accepted only after completing a certain period from the previous delivery. This can be calculated and billed easily through this.

### HD Finance (11/2023 - 02/2024)

- Using this application, a user gets different information and a cost effective solution by visiting unknown place effectively with all the necessary information regarding to various hotspots the User visit.
- Project finance refers to the funding of long-term projects, such as public infrastructure or services, industrial projects, and others through a specific financial structure. Finances can consist of a mix of debt and equity. The cash flows from the project enable servicing of the debt and repayment of debt and equity.
